

Dataflow matrix machine
based on
streams of V-values
and
variadic neurons.

<https://github.com/jsa-aerial/DMM>

$$x_{f,n_f,i}^{t+1} = \sum_{g \in F} \sum_{n_g \in L} \sum_{o \in L} w_{f,n_f,i,g,n_g,o}^t * y_{g,n_g,o}^t$$

$$y_{f,n_f}^{t+1} = f(x_{f,n_f}^{t+1})$$
